# Microsoft® Office 2010 ESSENTIALS

## Lesson 1: Computer Concepts

**LABYRINTH**  
LEARNING™

# Learning Objectives

- After studying this lesson, you will be able to:
  - ▲ Identify the basic parts of a computer system
  - ▲ Describe the difference between random access memory and storage memory
  - ▲ Identify whether a component of the computer system is hardware or software
  - ▲ Describe the role of an operating system in a computer
  - ▲ Describe the difference between application program files and user data files

# Categorizing Computer Systems

- Two basic categories of components
  - ▲ Hardware – physical components
  - ▲ Software – logical components
- Four categories of systems
  - ▲ Desktop
  - ▲ All-in-One
  - ▲ Notebook
  - ▲ Netbook

# Units of Measure

## ■ Volume/Capacity Units

Unit	Meaning	Capacity Examples
Bit	Zero or one	1,0
Byte	One character	A, B, C, D, &, @
Kilobyte (KB)	Thousand bytes	Two paragraphs of text
Megabyte (MB)	Million bytes	About 3 medium-length novels
Gigabyte (GB)	Billion bytes	About 250-500 digital photos
Terabyte (TB)	Trillion bytes	About 120 hours of HD video

# Units of Measure

## ■ Resolution Units

### ▲ Resolution (monitor)

1600x900

### ▲ Screen Size

## ■ Resolution (printer)

600 dpi (dots per inch)

# Units of Measure

## ■ Processor speed unit

### ▲ Gigahertz (GHz) – processor speed

## ■ Modem speed unit

### ▲ Bits per second (bps)

### ▲ Megabits per second (Mbps)

An online Internet speed test

# Computer Hardware Categories

- Each hardware category plays a key role:
  - ▲ Processing
  - ▲ Storage
  - ▲ Viewing/Printing
  - ▲ Networking
  - ▲ Human Interface

# Processing Hardware

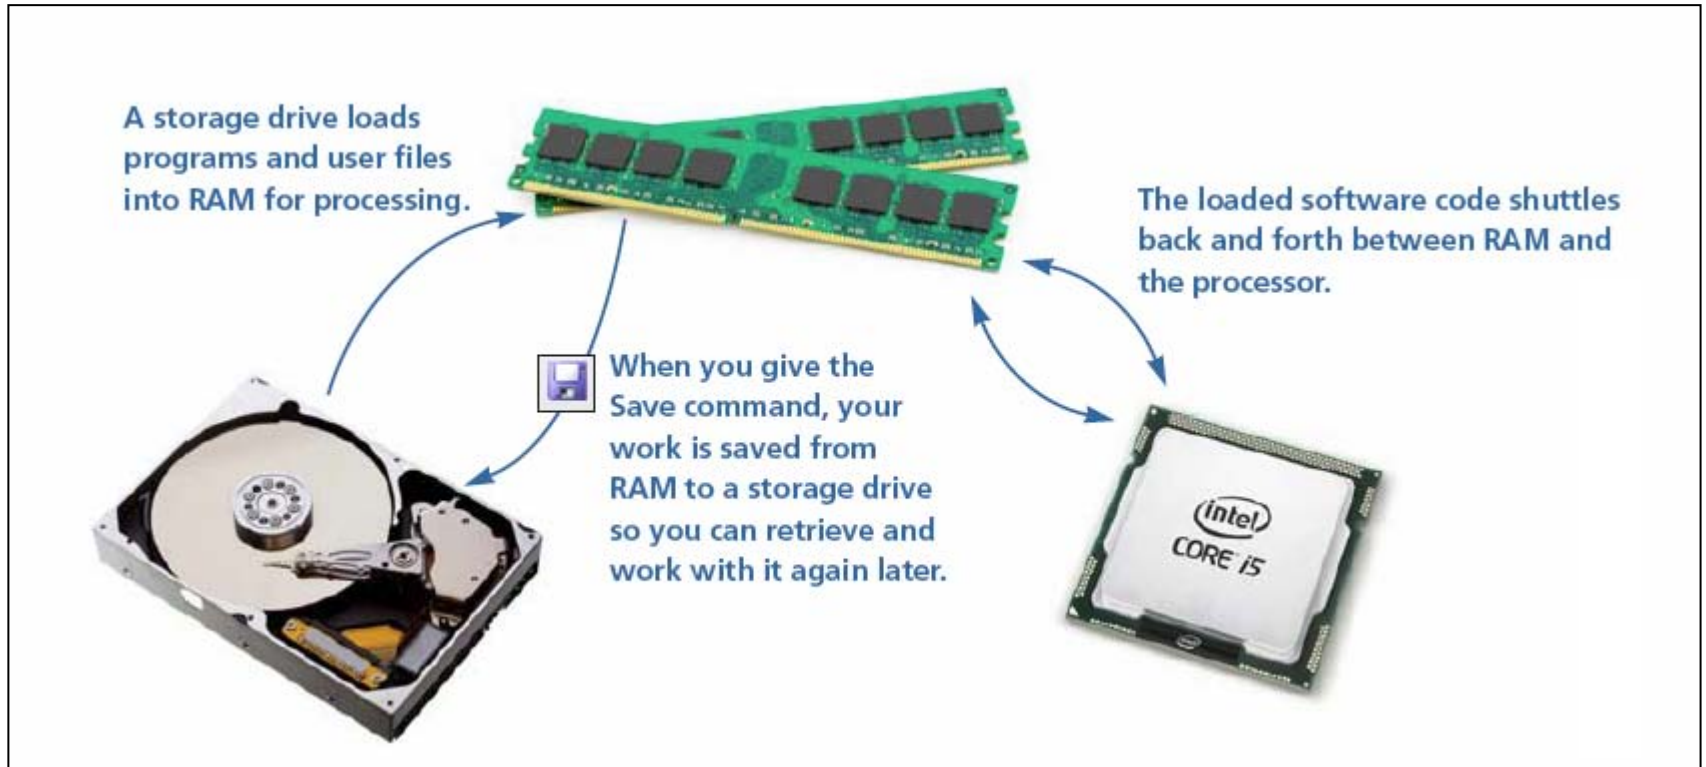

- Processor
  - ▲ Multi-core
  - ▲ Single-core

# Processing Hardware

## ■ RAM – The Computer's Workbench

# Processing Hardware

## ■ RAM and Performance

- ▲ More RAM allows you to run more programs at once efficiently

The Windows Task Manager keeps track of how much RAM is available for processing

# Storage Hardware

- Hard disk drive
- Optical Disc drive (CD, DVD, Blu-Ray)
- USB flash drive
- Solid-state drive (SSD)
- Additional Storage
  - ▲ External Drives
  - ▲ Card Readers

# Viewing and Printing Hardware

## ■ LCD Monitors

- ▲ Measuring Size
- ▲ Measuring Resolution
- ▲ Native Resolution

## ■ Printers

- ▲ Ink Jet
- ▲ Laser
- ▲ All-in-One

# Networking Hardware

## ■ Modem

- ▲ Cable

- ▲ DSL

- ▲ Dial-up

## ■ Router/Wireless Access Point

- ▲ Wireless-B

- ▲ Wireless-G

- ▲ Wireless-N

# Human Interface Hardware

- Mouse
- Touchpad
- Keyboard
- Touch screen
- Pen tablet
- Trackball

A Wacom Intuos pen tablet

# Human Interface Hardware

- USB ports connect all manner of devices to the computer: keyboards, printers, USB flash drives, etc.
- USB port types
  - ▲ USB 1.0
  - ▲ USB 2.0
  - ▲ USB 3.0

# Human Interface Hardware

## ■ Webcam

- ▲ Allows you to capture and transmit video and audio
- ▲ Built into most new notebook and netbook computers
- ▲ Easily added to desktop computers

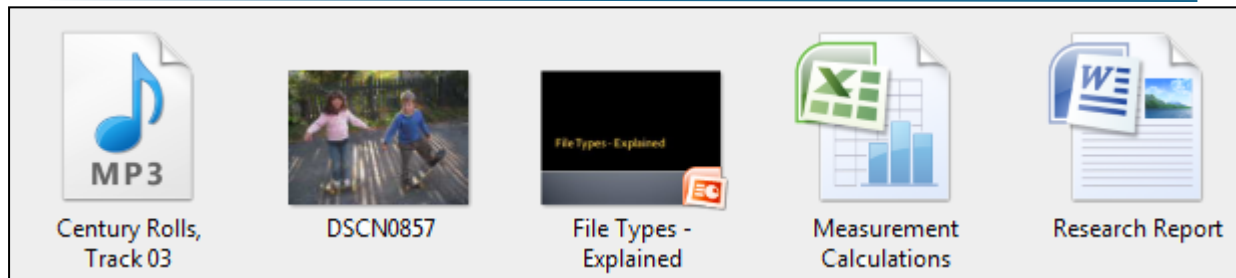

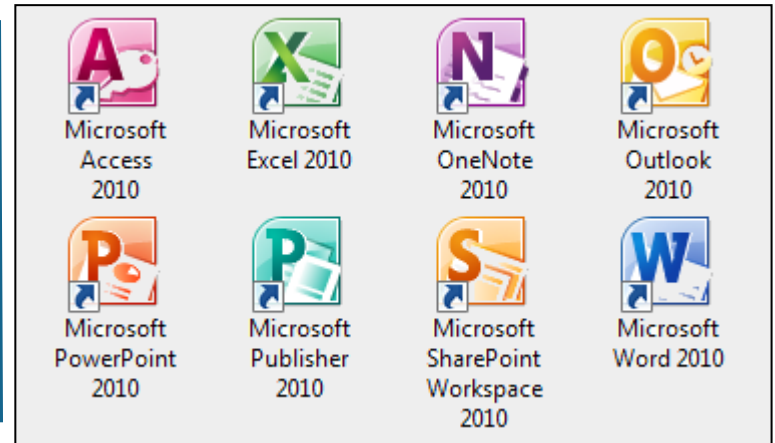

# Computer Software

## ■ Three basic software types:

▲ Operating system — 

▲ Application programs —

▲ User data

# Computer Software

## ■ Operating system roles

- ▲ Interpreting commands
- ▲ Controlling hardware
- ▲ Keeping track of all files
- ▲ Running application programs

# Computer Software

## ■ Windows Versions

▲ XP – Released in 2001 

▲ Vista – Released in 2006 

▲ 7 – Released in 2009 

## ■ 64-bit versions

▲ Can control more RAM (more than 4 GB)

▲ Need 64-bit drivers (software) to control hardware

# Computer Software

## ■ Application Program Categories

Category	Description	Examples
Proprietary (Commercial)	Applications for which you must purchase a license in order to use legally	Office 2010 Suite Photoshop
Shareware	Applications you are allowed to install and use without paying for initially; if you continue to use the software, you are required or expected to pay a license fee	WinZip SnagIt PDFCreator Xnote Stopwatch
Freeware	Free applications you do not have to pay for no matter how much you use them; these applications are still copyrighted, however, which means others can't turn around and try to sell the freeware program themselves	Jing Firefox Star Office
Malware	Often called <i>viruses</i> , these are applications designed to harm your computer.	MyDoom Code Red Blaster

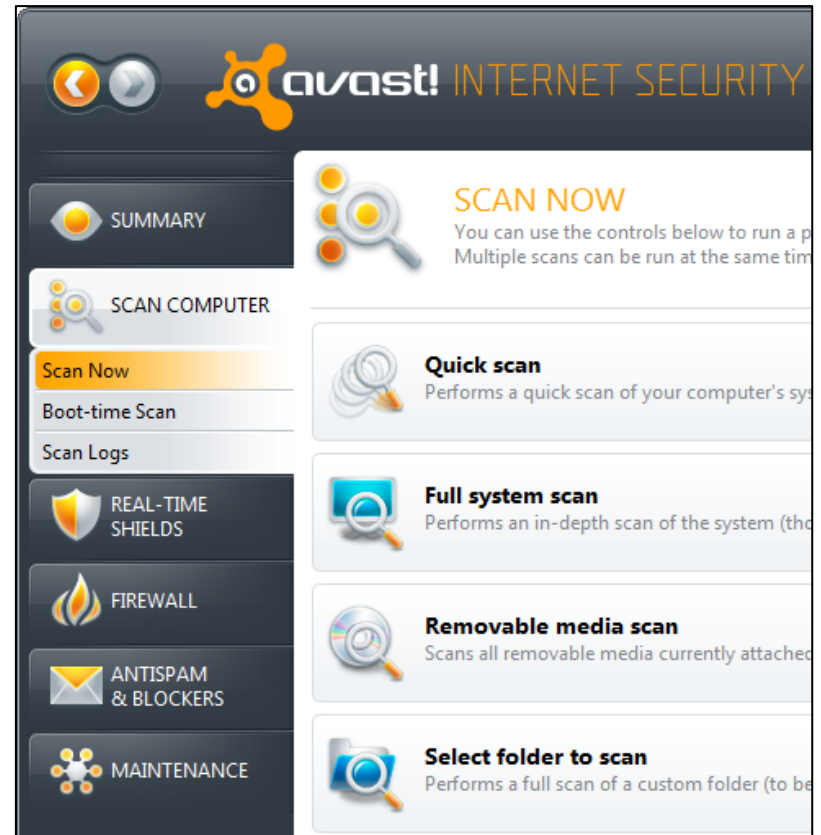

# Computer Software

- Application program types
  - ▲ Word processor (Word)
  - ▲ Spreadsheet (Excel)
  - ▲ Database (Access)
  - ▲ Presentation (PowerPoint)
  - ▲ Email/personal information (Outlook)
  - ▲ Web browsing (Firefox, Internet Explorer)

# Computer Software

## ■ Anti-malware

- ▲ Protects against computer viruses and various types of intrusions
- ▲ Absolutely necessary for any computer connected to the Internet

# Computer Software

## ■ User files – store you work

### ▲ File formats

- ◆ Indicated by a filename extension (normally hidden)
- ◆ Tell Windows which program to open a file with

The normally hidden filename extensions are displayed for these user files
